Professional bed bug elimination with guaranteed results

Bed bugs are resilient pests that reproduce quickly. DIY treatments fail 90% of the time. Our licensed exterminators use proven methods — heat treatment (kills all life stages in one day) and targeted chemical applications — to completely eliminate infestations.

- ✔ Heat treatment (whole room/house) — 100% kill rate
- ✔ Chemical treatment (liquid & dust) — residual protection
- ✔ Canine inspection — 95% accuracy detecting bed bugs
- ✔ Same-day emergency service
- ✔ 90-day warranty & follow-up inspections

🪳 Signs of bed bug infestation

✅ Red, itchy bites (often in clusters or lines)
✅ Blood stains on sheets
✅ Dark/rusty spots (feces) on mattress
✅ Live bugs or shed skins in seams
✅ Musty odor (sweet, almond-like)

Bed bug treatment options

🔥 **Heat Treatment**
Whole-room heat up to 135°F. Kills all bed bugs and eggs in 6-8 hours. No chemicals, single treatment. Most effective method. 100% success rate.

🧪 **Chemical Treatment**
Liquid and dust insecticides applied to baseboards, furniture seams, cracks. Residual protection for weeks. May require 2-3 treatments.

🐕 **Canine Inspection**
Specially trained dogs detect bed bugs with 95% accuracy. Identifies hiding spots before treatment. Post-treatment clearance available.

🧺 **Steam Treatment**
Targeted high-temperature steam for mattresses, sofas, delicate items. Kills on contact. Good for spot treatments.

🛡️ **Encasements & Monitors**
Bed bug-proof mattress encasements. Interceptor traps under bed legs. Prevent re-infestation after treatment.

📋 **Follow-up & Warranty**
Post-treatment inspection. 90-day warranty. Optional annual prevention plans.

Why professional bed bug extermination works

Bed bugs are experts at hiding — DIY treatments miss 90% of them.

🪳 **1 female = 500 eggs**
Bed bugs reproduce rapidly. A few bugs become thousands in months.

🔍 **Hiding experts**
They hide in mattress seams, headboards, outlets, baseboards, picture frames, even electronics.

⏱️ **Can survive 1 year without feeding**
Vacant homes still harbor bed bugs. Professional treatment is essential.

🛡️ **Pesticide resistance**
Many bed bug populations are resistant to common over-the-counter sprays.

Our bed bug extermination process

🔍 **1. Free inspection**
Licensed inspector searches common hiding spots. Canine inspection optional.

📋 **2. Treatment plan & quote**
Customized plan (heat, chemical, or combination). Upfront pricing, no obligation.

🔥 **3. Same-day treatment (often)**
Heat treatment: 6-8 hours. Chemical: 1-2 hours. Leave home, return same day.

✅ **4. Follow-up & warranty**
Post-treatment inspection. 90-day warranty. Re-treatment if needed.
